COMPANION GUIDE

Hi Camila Sales. Start with the portrait Blueprint and the room-flow map. This guide keeps the essentials: safety, climate, why it helps, the shopping list, and each before and after from the same photo.

SAFETY ESSENTIALS

- Anchor the six-drawer dresser to the wall. All six drawers stay.
- The crib holds a fitted sheet and a wearable sleep sack only — no pillows, bumpers, toys, or loose blankets.
- No portable heater, wall heater, or electric blanket near the sleep area.
- Keep window cords out of reach.
- Keep a clear floor path to the door.

CLIMATE COMFORT

- Keep the room about 68–72°F with the heating you already have.
- Warm the window with a thermal curtain, clear insulation film, and a door draft stopper.
- Still cold? Have an HVAC professional check door gaps and airflow.

WHY IT HELPS

A clear path from the door, one simple home for each everyday task, and a quick reset mean fewer decisions in the moment. Routines get calmer, and bedtime transitions are easier for both parent and child. The room becomes easier to read, easier to reset, and easier to live in.

SHOPPING LIST

[Furniture anchor kit \(dresser + shelves\)](#)

Qty 2 · \$15 each · \$30

[Blackout thermal curtain panels](#)
