

YOUR BLUEPRINT, IN TWO FILES

Hi Camila Sales. The image board is the visual plan — hero, room views, and the approximate layout. This companion guide is the detail: full steps, the shopping list, safety, climate, and the weekly reset.

Hi Camila. Nicholas is turning one, and this refresh keeps the nursery you already have while making the floor safer and the dresser easier to use every day.

WHAT THIS PLAN COVERS

- Anchor the dresser so it cannot tip
- Keep a clear floor path for a newly mobile toddler
- Warm the window without a portable heater

ZONES

Safe Sleep Zone

Crib stays clear of cords and loose bedding.

Diaper & Dress Zone

The six-drawer dresser stays. Wipes, diapers, and clothes live in the existing drawers, including the bottom drawer for bulky bedding.

Play & Movement Zone

Clear floor path along the door.

Comfort & Feed Zone

Rocker stays by the window. Thermal curtains cut the draft.

WHY IT HELPS

- Safer floor
- Warmer window
- Less to reset at night

SHOPPING LIST

Shopping list total \$174. The list total is the figure to shop.

ITEM	QTY	EST. PRICE	SUBTOTAL
Furniture anchor kit (dresser + shelves) Shelving	2	\$15	\$30
Blackout thermal curtain panels Organizer	2	\$35	\$70

STEP BY STEP

1. Anchor the six-drawer dresser to the wall before anything else.
2. Strip the crib to a bare mattress with one fitted sheet.
3. Install the thermal curtain panels and the door sweep.

SAFETY

- Do not replace dresser drawers with baskets.
- Do not add large open cubbies or cube storage.
- Do not place a portable heater or loose cord near the sleep area.

CLIMATE

Upgrade curtains with a thermal layer and keep the ones you have.

Install the thermal curtain panels and the door sweep.

Warm the window without a portable heater

Rocker stays by the window. Thermal curtains cut the draft.

Keep sleep comfort in a normal nursery range, about 68–72°F, using the heating you already have. Do not add a portable heater, electric blanket, or loose cord near the crib.

MAINTENANCE AND WEEKLY RESET

Once a week, take ten minutes: check that the dresser is still anchored, the crib is bare except a fitted sheet, the floor path is clear, and the room is a comfortable temperature. Put diaper supplies back in the existing drawers.

We left out anything that would replace dresser drawers with baskets or add large open cubbies.

NOTES

Windows and room proportions stay ~95% true to your photo. We left out anything that would replace dresser drawers with baskets or add large open cubbies.

BEFORE & AFTER — PHOTO REFERENCE

The image board is the primary visual. This page repeats the photos for reference. Your original photo is on the left. The organized view is on the right — same windows and walls (~95%). Paint is optional and is not applied in the visual. We do not invent an after image.
