

ORGANIZATION PLAN

Garage Organization Plan

BOUTIQUE · FUNCTIONAL · INTENTIONAL · AFFORDABLE

MINIMAL · NATURAL · PRACTICAL · CALM · SAME WALLS · SAME WINDOWS

Hi Ada Lovelace — this plan is designed for how you live.

A garage that is easy to park in and easy to find things — same walls and windows, a calmer system.

Needs: Hidden storage for tools · Clear floor for both cars · A landing zone by the door for sports bags

SIX-LAYER REASONING · OBSERVATION → INSTRUCTION

L01 Observation

Two-car garage photographed as used today: floor is a dump, tools mixed with sports bags, existing workbench still in place, bikes and mower share the stall. Possessions: Existing workbench, Kids' bikes, Lawn mower, Tools.

L02 Human need

Routine: After-school pickup: park both cars, drop sports bags at the door, grab a tool without stepping over piles, leave a clear stall overnight. Pain: Can't park both cars and still find tools or the kids' sports bags.

L03 Spatial constraint

Windows/dims stay ~95% true to the photo. Keep the shell — no invented floor plan. Keep the existing parking stall as a destination, not a dump.

L04 Recommendation

Five zones on the existing shell: stall, wall storage, circulation, workbench bins, door drop. The routine is park → drop bags → find a tool. Zoning the stall, the door, and the existing bench removes the pile that blocks all three, without changing walls or windows.

L05 Validation

Fit: pass · Flow: pass · Budget: pass · Possessions: pass. Two wall shelves, peg hooks, and lidded bins mount on the existing wall and sit on the workbench they already own. No new walls. Conflicts: Mower vs stall: mower must live on the side wall, not in a parking bay.. Assumptions: Existing walls can take light shelving and peg hooks.; Customer will confirm retail prices before buying..

L06 Customer instruction

Clear the stall and the door path first — nothing stays on the floor overnight. This week: Declutter the floor; Mount two shelves on the existing wall; Park tools in labeled lidded bins on the workbench.

ORGANIZED VIEW — YOUR REAL SPACE, RE-ZONED

Organized view coming soon

Your photo, re-zoned — visual arrives with the plan

1 Parking Zone 2 Storage Zone 3 Circulation Zone 4 Workbench 5 Door Drop

1 PROJECT STORY

Organize the garage you already have: stall stays a destination, tools and sports get labeled homes on existing walls.

2 WHAT'S NEW & WHY

1 Parking Zone

Keep the existing stall clear. No new walls.

2 Storage Zone

Bins and wall-mounted shelves on the existing wall.

3 Circulation Zone

Keep the walk path your photo already shows.

4 Workbench

Tools in labeled bins on the workbench you already own.

5 Door Drop

Hooks and a basket for daily in-and-out.

3 GARAGE FLOW GUIDE — ROOM LAYOUT & ZONES

1 PARKING ZON

Keep the existi

2 STORAGE ZON

4 WORKBENCH

Tools in label

5 DOOR DROP

Hooks and a bas

HOW YOU MOVE

Parking Zone → Storage Zone → Circulation Zone → Workbench → Door Drop

Enter, drop, walk the path the photo already shows, then store on existing walls. The stall / floor stays a destination — not a dump.

Floor plan not included — we do not invent room dimensions.

Conceptual zone map — not a measured floor plan. We do not invent room dimensions.

4 SYSTEM DETAILS

PARKING ZONE
Existing shell

01 PARKING ZONE

Parking Zone

- Keep the existing stall clear
- No new walls

STORAGE ZONE
Existing shell

02 STORAGE ZONE

Storage Zone

- Bins and wall-mounted shelves on the existing wall

CIRCULATION ZONE
Existing shell

03 CIRCULATION ZONE

Circulation Zone

- Keep the walk path your photo already shows

WORKBENCH
Existing shell

04 WORKBENCH

Workbench

- Tools in labeled bins on the workbench you already own

DOOR DROP
Existing shell

05 DOOR DROP

Door Drop

- Hooks and a basket for daily in-and-out

5 CURATED SELECTIONS — SHOPPING LIST

\$100 – \$300 typical for this starter kit

6 COLOR & MATERIAL PALETTE

OPTIONAL PAINT

Sea Salt

SW 6204

MATERIAL

Sage bins

MATERIAL

Natural wood

MATERIAL

Clear / labeled

MATERIAL

Woven / linen

Optional paint — consider if it helps. Not applied in the visual. Consider this color only if it helps your organization goal.

7 IMPLEMENTATION ROADMAP — SIMPLE ACTION PLAN

STEP 1

Declutter the floor

Typical org session — no construction.

STEP 2

Mount two shelves on the existing wall

Typical org session — no construction.

STEP 3

Park tools in labeled lidded bins on the workbench

Typical org session — no construction.

STEP 4

Hang door-drop hooks and the sports basket

Typical org session — no construction.

8 STYLING RULES & WEEKLY RESET

GUIDING PRINCIPLES

- 01 Keep the layout balanced
- 02 Hide clutter in matching bins
- 03 Leave a path to the car
- 04 One home per tool family

10-MINUTE WEEKLY RESET

- Return items to their labeled bin
- Clear the landing zone / floor path
- Recycle empty packaging
- Wipe one work surface
- Less visual noise

A short reset keeps the system — not a remodel.

9 NOTES & TIPS

Windows and room proportions stay ~95% true to your photo. We do not invent dimensions. Paint is optional — consider it only if it helps your goal.

10 DESIGNER ASSESSMENT

9.3

Storage

8.1

Function

8.6

7.6

Maintenance

8.6

Visual calm

8.2

Shop-ready

8.4

OVERALL POTENTIAL

Plan completeness — not a room measurement.

Validation — real checks, not room measurements.

FIT

PASS

Two wall shelves, peg hooks, and lidded bins mount on the existing wall and sit on the workbench they already own. No new walls.

FLOW

PASS

Door drop → circulation → stall. Floor mat marks the parking destination; bags never land in the stall.

BUDGET

PASS

\$100 – \$300

Kit totals \$227, inside the stated \$100 – \$300 band.

POSSESSIONS

PASS

Workbench stays. Bikes hang or stand on the existing wall path. Mower parks beside the stall, not in it.

Conflicts: Mower vs stall: mower must live on the side wall, not in a parking bay.

Assumptions: Existing walls can take light shelving and peg hooks.; Customer will confirm retail prices before buying.; Stud locations were not measured.
