

A garage that is easy to park in and easy to find things — same walls and windows, a calmer system.

ORGANIZED VIEW — YOUR REAL SPACE, RE-ZONED

Organized view coming soon

Your photo, re-zoned — visual arrives with the plan

GARAGE NEEDS

-  **Hidden storage for tools**
-  **Clear floor for both cars**
-  **A landing zone by the door for sports bags**

WALL COLOR SUGGESTION

Sea Salt

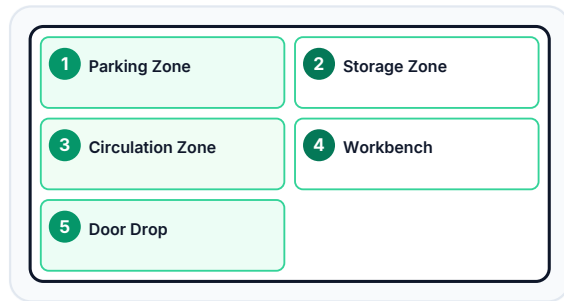

SW 6204

Optional — consider if it helps the goal.

BUDGET RANGE: \$100 – \$300

Full shopping list and DIY steps on page 2.

ZONE PLAN (TOP VIEW)

Conceptual zone map — not a measured floor plan.

ROOM LAYOUT & ZONES

- 1 Parking Zone**
Keep the existing stall clear. No new walls.
- 2 Storage Zone**
Bins and wall-mounted shelves on the existing wall.
- 3 Circulation Zone**
Keep the walk path your photo already shows.
- 4 Workbench**
Tools in labeled bins on the workbench you already own.
- 5 Door Drop**
Hooks and a basket for daily in-and-out.

DESIGN STRATEGY

- ✓ Keep the layout balanced
- ✓ Hide clutter in matching bins
- ✓ Leave a path to the car
- ✓ One home per tool family

SIMPLE ACTION PLAN

- 1 Declutter the floor
- 2 Mount two shelves on the existing wall
- 3 Park tools in labeled lidded bins on the workbench
- 4 Hang door-drop hooks and the sports basket

BENEFITS

- ✓ Less visual noise
- ✓ Better daily routine
- ✓ Easier to park

BUDGET RANGE: \$100 – \$300

Items chosen to bring the biggest impact for your budget.

IMPLEMENTATION ROADMAP — SIMPLE ACTION PLAN

THIS WEEK — DIY STEPS

Clear the stall and the door path first — nothing stays on the floor overnight.

- Declutter the floor
- Mount two shelves on the existing wall
- Park tools in labeled lidded bins on the workbench
- Hang door-drop hooks and the sports basket

Typical org session — no construction.

DO NOT

- Do not add walls, windows, or doors.
- Do not invent room dimensions.
- Paint is optional — skip it unless it helps the goal.

10-MINUTE WEEKLY RESET

- Return tools to labeled bins
- Hang bags on the door hooks
- Roll the mower to the side wall
- Wipe the workbench.

A short reset keeps the system — not a remodel.

WHY THIS PLAN · OBSERVATION → INSTRUCTION

L01 Observation

Two-car garage photographed as used today: floor is a dump, tools mixed with sports bags, existing workbench still in p...

L02 Human need

Routine: After-school pickup: park both cars, drop sports bags at the door, grab a tool without stepping over piles, le...

L03 Spatial constraint

Windows/dims stay ~95% true to the photo. Keep the shell — no invented floor plan. Keep the existing parking stall as a...

L04 Recommendation

Five zones on the existing shell: stall, wall storage, circulation, workbench bins, door drop. The routine is park → dr...

L05 Validation

Fit: pass · Flow: pass · Budget: pass · Possessions: pass. Two wall shelves, peg hooks, and lidded bins mount on the ex...

L06 Customer instruction

Clear the stall and the door path first — nothing stays on the floor overnight. This week: Declutter the floor; Mount t...

VALIDATION — real checks, not room measurements.

FIT
PASS

Two wall shelves, peg hooks, and lidded bins mount on the existing wall and sit on the wo...

FLOW
PASS

Door drop → circulation → stall. Floor mat marks the parking destination; bags never land...

BUDGET
PASS

\$100 – \$300
Kit totals \$227, inside the stated \$100 – \$300 band.

POSSESSIONS
PASS

Workbench stays. Bikes hang or stand on the existing wall path. Mower parks beside the st...

Conflicts: Mower vs stall: mower must live on the side wall, not in a parking bay.

Assumptions: Existing walls can take light shelving and peg hooks.; Customer will confirm retail prices before buying.
