

Garage Organization Plan

COMPANION GUIDE

Hi Ada. Start with the portrait Blueprint and Room Flow map to see the room's overall plan and organization. The room outline is approximate, and furniture footprints and zones are approximate too. This companion guide brings together the practical essentials: safety, climate comfort, the reasoning behind the zone-based plan, the shopping list, and each source-matched before-and-after view.

SAFETY ESSENTIALS

- Paint is optional — skip it unless it helps the goal.
- Anchor tall or heavy furniture to the wall before you load it.
- Keep a clear floor path to the door.

CLIMATE COMFORT

- Use the heating and cooling already in the room. This plan does not add portable heaters or new vents.

WHY THE FLOWSPACE ZONE APPROACH HELPS

FlowSpace gives each part of the room a clear job—parking, storage, workbench, or door drop. With an open path and a simple home for everyday items, daily routines require fewer decisions, resets happen faster, and the room becomes calmer and easier to use.

SHOPPING LIST

Lidded bins

[Search at Target](#)

Qty 6 · \$12 each · \$72
